Osler often referred to his bedside library classic works as a guide to our inner education - inspiring one to be a great doctor with even greater humanity. Serving as an introduction to the world's great literature for physicians, this new volume features a collection of excerpts from the favorite books of Sir William Osler. To further supplement Osler's guidance, the editors have included excerpts from 20 other great works of literature. Each is introduced by a leader in medical humanities who discusses why these works have long been admired.
