Development projects are all about bringing benefits to people, but oftentimes they also create negative impacts on the local population.

Implementing development projects in a way that minimizes the adverse impacts of projects on local populations, however, is a challenging process.

Challenging as it may be, some multilateral financial organizations have measures in place to protect the people affected by their projects, particularly the most vulnerable populations.

The implementation of these social safeguard measures is a critical component of the development process; they can facilitate or hinder the success of a project.

The fascinating narrative accounts included in this book tell the story of how social safeguard practitioners struggle to protect the people affected by international development projects.
