Databases are an increasingly important part of the everyday life of all healthcare professionals. This straightforward practical guide to creating and using databases is closely tailored to the needs of healthcare practitioners. It covers design and implementation including simple data modelling, normalisation, tables, forms, queries and reports and shows how a database can be integrated with a word processor to produce letters for mailing. The easy to use step-by-step format guides the reader through the text in a user-friendly style by showing what actually appears on the computer and by making extensive use of screen shots, toolbar icons, mouse and keyboard actions. This clear and concise approachable book is designed for all general practitioners, practice managers and nurses, clinical governance and audit staff, doctors, nurses and other hospital staff, and staff involved in research and development - who need have no prior knowledge of databases.
