Children and Their Families: The Continuum of Nursing Care Vicky Bowden RN DNSc, Cindy S. Greenberg DNSc RN CPNP

Succeed in your pediatric nursing course with **Children and Their Families, Third Edition!** This bestselling text has already helped thousands of students master the concepts and skills necessary for effective practice in a variety of settings, from home to school to medical center.

The book's easy-to-understand presentation, striking visuals, and built-in learning tools help you develop an understanding of the unique role you'll have in working with all members of the pediatric healthcare system and equip you to make critical judgments and decisions in a variety of settings across the continuum of care.

- Broaden your understanding of the interrelated dynamics of pediatric nursing care and make the leap from theory to practice, through *Progressive Case Studies* that follow a community of pediatric clients through each chapter.
- Learn to create and implement care plans through *Nursing Plan of Care* features.
- Develop an understanding of important psychosocial, teaching, physiologic, or pathophysiologic differences among children of various age groups with handy *Developmental Consideration* charts.
- Prepare for effective practice with *Care Paths* that summarize the interdisciplinary plan of care for a child with a specific condition and include nursing diagnoses to alert the health care team to current or potential issues that require intervention.
- Learn the skills you need for effective client/family education with *Teaching Intervention Plans (TIPs)* that present interdisciplinary plans focused on aspects of care involving child and/or family education.
- Evaluate and improve your critical thinking skills with *Clinical Judgments* features.
- Develop the skills you need to work with families in community settings through *Community Care Charts* that present special teachings and clinical information.
- Master important information through *Nursing Intervention Charts* that provide a more in-depth description of particular nursing care activities.
- Learn how to assess disorders in various body systems through *Focused Health History charts* that summarize specific health history information.
- Identify abnormal findings through a *Focused Physical Assessment chart* that highlights assessment findings and explains what would be considered an abnormal finding.
- Prepare for clinical practice with *Nursing Diagnoses and Outcome charts* that summarize the nursing diagnoses and outcomes that are consistently applicable to defined populations of children with specific health challenges.
- Enhance your understanding of how children are cared for in other cultures through *Cross-Cultural Care* boxes.
- Develop an understanding of how research informs pediatric practice through *Evidence-Based Practice* boxes.
