## **Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences)** Kevin J. Grimm PhD, Nilam Ram PhD, Ryne Estabrook PhD

Growth models are among the core methods for analyzing how and when people change. Discussing both structural equation and multilevel modeling approaches, this book leads readers step by step through applying each model to longitudinal data to answer particular research questions. It demonstrates cutting-edge ways to describe linear and nonlinear change patterns, examine within-person and between-person differences in change, study change in latent variables, identify leading and lagging indicators of change, evaluate co-occurring patterns of change across multiple variables, and more. User-friendly features include real data examples, code (for Mplus or NLMIXED in SAS, and OpenMx or nlme in R), discussion of the output, and interpretation of each model's results.

### Pedagogical Features:

- \*Real, worked-through longitudinal data examples serving as illustrations in each chapter.
- \*Script boxes that provide code for fitting the models to example data and facilitate application to the reader's own data.
- \*"Important Considerations" sections offering caveats, warnings, and recommendations for the use of specific models.
- \*Companion website supplying datasets and syntax for the book's examples, along with additional code in SAS/R for linear mixed-effects modeling.

**From reader reviews:**

**Maryanna Kuhns:**

Book is to be different for every single grade. Book for children till adult are different content. We all know that that book is very important normally. The book Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences) had been making you to know about other information and of course you can take more information. It is extremely advantages for you. The guide Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences) is not only giving you a lot more new information but also to become your friend when you really feel bored. You can spend your own personal spend time to read your reserve. Try to make relationship with all the book Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences). You never feel lose out for everything in case you read some books.

**Marc Starr:**

As people who live in often the modest era should be change about what going on or info even knowledge to make these people keep up with the era that is certainly always change and make progress. Some of you maybe may update themselves by reading books. It is a good choice in your case but the problems coming to a person is you don't know what type you should start with. This Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences) is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

**Arlene Farmer:**

The book untitled Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences) is the reserve that recommended to you to study. You can see the quality of the publication content that will be shown to anyone. The language that creator use to explained their ideas are easily to understand. The article author was did a lot of investigation when write the book, to ensure the information that they share to you personally is absolutely accurate. You also will get the e-book of Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences) from the publisher to make you much more enjoy free time.

**Patricia Miller:**

Do you like reading a book? Confuse to looking for your favorite book? Or your book was rare? Why so many problem for the book? But almost any people feel that they enjoy regarding reading. Some people likes reading through, not only science book but additionally novel and Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences) or perhaps others sources were given knowledge for you. After you know how the truly amazing a book, you feel would like to read more and more. Science book was created for teacher or even students especially. Those books are helping them to

bring their knowledge. In some other case, beside science publication, any other book likes Growth Modeling: Structural Equation and Multilevel Modeling Approaches (Methodology in the Social Sciences) to make your spare time a lot more colorful. Many types of book like here.
