Human Information Processing: An Introduction to Psychology

Peter H. Lindsay, Donald A. Norman

Human Information Processing: An Introduction to Psychology Peter H. Lindsay, Donald A. Norman
Human Information Processing: An Introduction to Psychology aims to convey the excitement of modern experimental psychology to the beginning student. The book discusses the organization of auditory perceptions; neural information processing; and the theories of pattern recognition. The text also describes the visual system; the dimensions of vision; the auditory system; and the dimensions of sound. The neural basis of memory; transient memories; the structure of memory; and memory processes are also considered. The book further tackles language acquisition; the process of learning and cognitive development; problem solving; and decision making. The text also looks into motivation and the biochemical responses to stress. Psychologists and students taking psychology and related courses will find the book useful."
