**Real Time Face-Tracking and Iris Localization: The design of a real time face-tracking and iris localization system using image processing and circle fitting technique** Husniza Razalli, Rahmita Wirza O. K. Rahmad, Ramlan Mahmud

Robust, non-intrusive human eye detection problem has been a fundamental and challenging problem for computer vision area. Not only it is a problem of its own, it can be used to ease the problem of finding the locations of other facial features for recognition tasks and human-computer interaction purposes as well. Many previous works have the capability of determining the locations of the human eyes but the main task in this thesis is not only a vision system with eye detection capability. Our aim is to design a real-time, robust, scale-invariant face tracker system with human eye movement indication property using the movements of iris based on localization technique indicate from image processing and circle fitting technique. As a result, our eye tracker system was successfully implemented using non-intrusive webcam with less error.

**From reader reviews:**

**Nicole Garner:**

Nowadays reading books are more than want or need but also work as a life style. This reading behavior give you lot of advantages. Advantages you got of course the knowledge the actual information inside the book which improve your knowledge and information. The knowledge you get based on what kind of book you read, if you want attract knowledge just go with schooling books but if you want truly feel happy read one together with theme for entertaining for instance comic or novel. Often the Real Time Face-Tracking and Iris Localization: The design of a real time face-tracking and iris localization system using image processing and circle fitting technique is kind of guide which is giving the reader unforeseen experience.

**Ruth Vigue:**

Hey guys, do you wishes to finds a new book to see? May be the book with the name Real Time Face-Tracking and Iris Localization: The design of a real time face-tracking and iris localization system using image processing and circle fitting technique suitable to you? Often the book was written by renowned writer in this era. Often the book untitled Real Time Face-Tracking and Iris Localization: The design of a real time face-tracking and iris localization system using image processing and circle fitting techniqueis the main of several books that everyone read now. This particular book was inspired lots of people in the world. When you read this publication you will enter the new way of measuring that you ever know ahead of. The author explained their concept in the simple way, consequently all of people can easily to know the core of this guide. This book will give you a lots of information about this world now. To help you see the represented of the world on this book.

**Nancy Sherman:**

In this age globalization it is important to someone to get information. The information will make a professional understand the condition of the world. The healthiness of the world makes the information quicker to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You can see that now, a lot of publisher this print many kinds of book. The actual book that recommended to your account is Real Time Face-Tracking and Iris Localization: The design of a real time face-tracking and iris localization system using image processing and circle fitting technique this publication consist a lot of the information on the condition of this world now. This specific book was represented just how can the world has grown up. The dialect styles that writer value to explain it is easy to understand. The particular writer made some exploration when he makes this book. That's why this book appropriate all of you.

**Catharine Rosol:**

What is your hobby? Have you heard that question when you got pupils? We believe that that query was

given by teacher for their students. Many kinds of hobby, Everybody has different hobby. And you know that little person similar to reading or as reading through become their hobby. You have to know that reading is very important as well as book as to be the factor. Book is important thing to provide you knowledge, except your current teacher or lecturer. You find good news or update in relation to something by book. Many kinds of books that can you choose to adopt be your object. One of them is niagra Real Time Face-Tracking and Iris Localization: The design of a real time face-tracking and iris localization system using image processing and circle fitting technique.
