Science of Time and the Theory of Everything (Paperback) Bhousaheb Dhondiram Bhosle

This is the mysterious book encompassing all the sciences as one science of time including mathematics, geometry, trigonometry even in nano space time energy mass scale (genetic) to determine the genetic drive (developmental dynamics of the fetus-The Golden Egg (Hiranya garbha) in galactic space-time energy mass scale as non-dual memory energy time) retaining the same word and the same meaning. As far as mathematics is concerned, this new mathematics (science of time) will be a delight to any mathematician. It is very simple-only addition, subtraction, multiplication and division nothing more and nothing less, but it can answer and prove anything and everything from geometry to trigonometry of oscillating and revolving dimensional dynamics, from genetic drive to developmental fetus, from mind to astrology and astronomy. It will be a dream for the geneticists and if the astronomers can understand the fifth force (the stabilizing force), it will be eternal heaven for them. This ancient theory (Surya-Siddhanta)-The theory of harmonics has been completely solved and the details of the theory (constants) in terms of time (continuity of moments) has been linked as a whole as one time of manifestation determined by frequencies per second and their phase changes to determine the final oscillating centre as the final space time energy mass oscillating constant before the re-manifestation retaining the continuity of moments (time).
