Stem Cells and Cardiac Regeneration (Stem Cell Biology and Regenerative Medicine)

This book provides an update of recent advances in the basic and clinical applications of cell-based therapies for myocardial repair and regeneration in ischemic heart disease (IHD) and heart failure (HF). The first sections of the book illuminate basic aspects of stem cells such as definitions, isolation criteria and characterization of embryonic and adult stem cells, as well as pluripotent stem cells and tissue specific progenitor and stem cells. In the following section, the text examines the role of critical regulators of stem cell differentiation in myocardial regeneration, that include circadian rhythms, microRNAs, epigenetics, microvesicles, and exosomes. The text concludes with a review of the use of stem/progenitor cells in cardiac regeneration and discuss current controversies, unresolved issues, challenges, and future directions. *Stem Cells and Cardiac Regeneration* is addressed to a wide audience consisting of cardiologists, clinicians, and research scientists, who will learn new concepts in cardiovascular regeneration and repair with special focus on molecular mechanisms and therapeutic potential for cardiovascular regeneration.

From reader reviews:

Thomas Whitaker:

In this 21st century, people become competitive in every single way. By being competitive right now, people have to do something to make them survive, being in the middle of the actual crowded place and notice through surrounding. One thing that sometimes many people have underestimated the item for a while is reading. Yep, by reading an e-book your ability to survive boosts then having a chance to stand than others is high. For yourself who want to start reading some sort of book, we give you this kind of Stem Cells and Cardiac Regeneration (Stem Cell Biology and Regenerative Medicine) book as a nice and daily reading e-book. Why, because this book is usually more than just a book.

Sheila Nathan:

The book with title Stem Cells and Cardiac Regeneration (Stem Cell Biology and Regenerative Medicine) includes a lot of information that you can discover it. You can get a lot of help after reading this book. This particular book exists new understanding the information that exists in this book represented the condition of the world at this point. That is important to you to learn how the improvement of the world. This kind of book will bring you in a new era of the global growth. Book is an important thing to add your knowledge, except your teacher or lecturer. You see good news or update regarding something by book. Numerous books that you can choose to use be your object. One of them are these claims Stem Cells and Cardiac Regeneration (Stem Cell Biology and Regenerative Medicine).

Frederick Palazzo:

Reading a reserve makes you to get more knowledge from this. You can take knowledge and information from your book. Book is composed or printed or created from each source which filled with update of news. In this modern era like today, many ways to get information are available for anyone. From media social including newspaper, magazines, science guide, encyclopedia, reference book, book and comic. You can add your knowledge by that book. Do you want to spend your spare time to spread out your book? Or just trying to find the Stem Cells and Cardiac Regeneration (Stem Cell Biology and Regenerative Medicine) when you desired it?
