## High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science)

On the 23rd of April, 2001, the 6th Workshop on High-Level Parallel Programming Models and Supportive Environments (LCTES'98) was held in San Francisco. HIPS has been held over the past six years in conjunction with IPDPS, the International Parallel and Distributed Processing Symposium. The HIPS workshop focuses on high-level programming of networks of workstations, computing clusters and of massively-parallel machines. Its goal is to bring together researchers working in the areas of applications, language design, compilers, system architecture and programming tools to discuss new developments in programming such systems. In recent years, several standards have emerged with an increasing demand of support for parallel and distributed processing. On one end, message-passing frameworks, such as PVM, MPI and VIA, provide support for basic communication. On the other hand, distributed object standards, such as CORBA and DCOM, provide support for handling remote objects in a client-server fashion but also ensure certain guarantees for the quality of services. The key issues for the success of programming parallel and distributed environments are high-level programming concepts and efficiency. In addition, other quality categories have to be taken into account, such as scalability, security, bandwidth guarantees and fault tolerance, just to name a few. Today's challenge is to provide high-level programming concepts without sacrificing efficiency. This is only possible by carefully designing for those concepts and by providing supportive programming environments that facilitate program development and tuning.

**From reader reviews:**

**Betty Castaneda:**

The book High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) can give more knowledge and information about everything you want. So just why must we leave the good thing like a book High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science)? A number of you have a different opinion about publication. But one aim which book can give many info for us. It is absolutely proper. Right now, try to closer using your book. Knowledge or facts that you take for that, it is possible to give for each other; you could share all of these. Book High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) has simple shape but you know: it has great and large function for you. You can seem the enormous world by open up and read a book. So it is very wonderful.

**Oren Nelson:**

This High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) book is just not ordinary book, you have after that it the world is in your hands. The benefit you obtain by reading this book will be information inside this guide incredible fresh, you will get information which is getting deeper an individual read a lot of information you will get. This specific High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) without we realize teach the one who examining it become critical in pondering and analyzing. Don't end up being worry High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) can bring if you are and not make your tote space or bookshelves' grow to be full because you can have it in your lovely laptop even telephone. This High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) having great arrangement in word as well as layout, so you will not really feel uninterested in reading.

**David McClure:**

As people who live in the particular modest era should be change about what going on or facts even knowledge to make these individuals keep up with the era and that is always change and move ahead. Some of you maybe will update themselves by looking at books. It is a good choice in your case but the problems coming to you actually is you don't know what type you should start with. This High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) is our recommendation so you

keep up with the world. Why, because book serves what you want and need in this era.

**John Harrison:**

The book untitled High-Level Parallel Programming Models and Supportive Environments: 6th International Workshop, HIPS 2001 San Francisco, CA, USA, April 23, 2001 Proceedings (Lecture Notes in Computer Science) contain a lot of information on it. The writer explains the girl idea with easy way. The language is very clear and understandable all the people, so do not necessarily worry, you can easy to read this. The book was compiled by famous author. The author will bring you in the new period of literary works. You can read this book because you can continue reading your smart phone, or gadget, so you can read the book within anywhere and anytime. If you want to buy the e-book, you can available their official web-site as well as order it. Have a nice read.
