**Statistics in Epidemiology: Methods, Techniques and Applications** Hardeo Sahai, Anwer Khurshid  
Epidemiologic studies provide research strategies for investigating public health and scientific questions relating to the factors that cause and prevent ailments in human populations. *Statistics in Epidemiology: Methods, Techniques and Applications* presents a comprehensive review of the wide range of principles, methods and techniques underlying prospective, retrospective and cross-sectional approaches to epidemiologic studies. Written for epidemiologists and other researchers without extensive backgrounds in statistics, this new book provides a clear and concise description of the statistical tools used in epidemiology. Emphasis is given to the application of these statistical tools, and examples are provided to illustrate direct methods for applying common statistical techniques in order to obtain solutions to problems. *Statistics in Epidemiology: Methods, Techniques and Applications* goes beyond the elementary material found in basic epidemiology and biostatistics books and provides a detailed account of techniques:
