Top 10 Trading Setups: How to Find them, When to Trade them, How to Make Money with them

Ivaylo Ivanov

Different setups work in different markets. Everyone makes money in a bull market. Not everyone keeps it when the market goes into correction or a range-bound, choppy mode. A good trader is able to adapt to changing markets. There are four major types of markets and each of them requires a different approach: Uptrend, Range-bound, Downtrend, and Bottoming Process. In this book, I show you how to recognize each market environment and how to best approach it. This is one of the most practical trading books ever written. It doesn't waste your time with personal stories of grandeur. It is all about setups - what setups to trade and when, why they work, how to find them, how to trade them, where to exit. It is a complete game plan for any market environment. And since I believe a good picture is worth a thousand words - there are 140 annotated charts with examples for all ten major setups discussed in the book.
