## **Comprehensive Textbook of Hallux Abducto Valgus Reconstruction** David E. Marcinko

Hallux valgus (bunion) surgery represents a large percentage of all surgeries performed by podiatrists. Using ample illustrations this book addresses the major aspects of performing all variations of this surgery, from physical examination and diagnosis to non-operative options to surgical procedures and techniques. Large chapters on diagnostic imaging modalities and internal fixation devices/techniques are included. Every major classification of hallux valgus and all accepted surgical interventions are included in a large, clear format. The book features comprehensive pre, peri, and post-operative techniques and procedures for managing common and potentially serious medical conditions; 700 photographs and line drawings on procedures, techniques, and radiographic evaluation; up to 20 colour illustrations, with some done by computer-enhanced, three dimensional technology; and large sections on radiology and internal fixation techniques, which are not well understood by podiatrists.
