**Oils, Detergents and Maintenance Specialties, Volume 1, Materials and Processes** Benjamin Levitt  
CONTENTS - 1. INTRODUCTION - 2. ANIMAL FATS AND OILS - 3. VEGETABLE FATS AND OILS  
- 4. FATTY ACIDS-FATTY ALCOHOLS-GLYCEROL - 5. SURFACTANTS AND SURFACE  
ACTIVITY - 6. PRODUCTION OF FATS AND OILS - 7. SOAP MANUFACTURE - 8. SYNTHETIC  
DETERGENTS - 9. ANALYSIS OF OILS AND DETERGENTS - INDEX - Preface - Presented in this book  
are quantities of data, gathered during many years in my practice of chemistry, either as resident chemist in  
manufacturing plants, or as a consultant to the soap and related industries. The style is didactic and such that  
it may readily be understood by non-technical personnel. Involved theoretical and technical discussions have  
been avoided. As far as possible, references have been included at the end of each chapter. Although much of  
the information contained in this work is well within my own experience, much of it has been gleaned also  
from manufacturers' technical bulletins or through private correspondence. Many patents have been cited,  
merely as examples of products discussed; this is not to be construed as recommending the infringement of  
any such patents. The various formulations are presented in good faith, but no warranty is given, nor is  
freedom from any patent to be inferred. With a little ingenuity on the part of the reader, many useful and  
efficient products may be made along the lines discussed, without in any way infringing on patented  
products. Because of numerous factors affecting results, all the formulations cited herein, although believed  
to be reliable (most of them having emanated from the greatest laboratories in the world) should be tested  
thoroughly. It is especially recommended that manufacturers make their own tests to determine the suitability  
of the formulations, for the specific applications intended. I am indebted to the manufacturers of the many  
chemicals named in the book, for information which I gathered either from direct correspondence or from  
their technical bulletins; also for their many samples with which I compounded some of the formulas.  
Special mention should be made of those companies that supplied photographs of equipment and  
installations depicting various processes. I have tried to include all information pertinent to each formula,  
and credit has been given to all identified suppliers, so that additional information, if needed, may be  
obtained from the manufacturers of the basic materials used. Finally, I am grateful to the publishers for  
valuable assistance in the organization and presentation of my quantities of material which now comes out as  
not merely a second edition of my Oil, Fat, and Soap, but as a much more comprehensive new book.
