Introduction to Calculus and Classical Analysis (Undergraduate Texts in Mathematics) Omar Hijab

This text is intended for an honors calculus course or for an introduction to analysis. Involving rigorous analysis, computational dexterity, and a breadth of applications, it is ideal for undergraduate majors. This third edition includes corrections as well as some additional material.

Some features of the text include: The text is completely self-contained and starts with the real number axioms; The integral is defined as the area under the graph, while the area is defined for every subset of the plane; There is a heavy emphasis on computational problems, from the high-school quadratic formula to the formula for the derivative of the zeta function at zero; There are applications from many parts of analysis, e.g., convexity, the Cantor set, continued fractions, the AGM, the theta and zeta functions, transcendental numbers, the Bessel and gamma functions, and many more; Traditionally transcendently presented material, such as infinite products, the Bernoulli series, and the zeta functional equation, is developed over the reals; and There are 385 problems with all the solutions at the back of the text.

From reader reviews:

June Edwards:

Now a day folks who Living in the era where everything reachable by talk with the internet and the resources inside it can be true or not involve people to be aware of each data they get. How many people to be smart in obtaining any information nowadays? Of course the answer is reading a book. Studying a book can help persons out of this uncertainty Information specifically this Introduction to Calculus and Classical Analysis (Undergraduate Texts in Mathematics) book as this book offers you rich details and knowledge. Of course the info in this book hundred percent guarantees there is no doubt in it you probably know this.

Joshua Rodrigue:

Do you have something that you like such as book? The book lovers usually prefer to opt for book like comic, small story and the biggest you are novel. Now, why not attempting Introduction to Calculus and Classical Analysis (Undergraduate Texts in Mathematics) that give your fun preference will be satisfied through reading this book. Reading behavior all over the world can be said as the method for people to know world better then how they react to the world. It can't be stated constantly that reading behavior only for the geeky person but for all of you who wants to possibly be success person. So , for all of you who want to start reading as your good habit, you are able to pick Introduction to Calculus and Classical Analysis (Undergraduate Texts in Mathematics) become your personal starter.

Vickie Reed:

In this time globalization it is important to someone to acquire information. The information will make you to definitely understand the condition of the world. The healthiness of the world makes the information simpler to share. You can find a lot of references to get information example: internet, magazine, book, and soon. You will observe that now, a lot of publisher in which print many kinds of book. Typically the book that recommended to your account is Introduction to Calculus and Classical Analysis (Undergraduate Texts in Mathematics) this e-book consist a lot of the information of the condition of this world now. This specific book was represented how do the world has grown up. The terminology styles that writer use for explain it is easy to understand. The actual writer made some analysis when he makes this book. That is why this book suitable all of you.

Michael Parker:

That publication can make you to feel relax. This kind of book Introduction to Calculus and Classical Analysis (Undergraduate Texts in Mathematics) was vibrant and of course has pictures on the website. As we know that book Introduction to Calculus and Classical Analysis (Undergraduate Texts in Mathematics) has many kinds or category. Start from kids until youngsters. For example Naruto or Investigation company Conan you can read and believe that you are the character on there. So , not at all of book are generally make you bored, any it makes you feel happy, fun and rest. Try to choose the best book for yourself and try to like

reading that.
