Water Pollution Control in Asia documents the proceedings of the Second IAWPRC Asian Conference on Water Pollution Control, held in Bangkok, Thailand, 9-11 November 1988. The conference brings together the various factors that must be considered when investigating the development of water supply and control of sewage disposal systems, especially for small villages or towns and large communities in Asia which are situated too far from a piped system of water supply, thus requiring its own sources treatment and sewage disposal.

The contributions made by researchers at the conference are organized into seven parts. Part 1 examines the various aspects of water quality management. The papers in Part 2 deal with the analysis and cleanup of river, lake, and marine pollution. Part 3 discusses the treatment of human waste while Part 4 is devoted to industrial waste treatment approaches. Part 5 focuses on water treatment methods. Part 6 contains studies on water reuse and groundwater contamination. The papers in Part 7 cover various topics such as wastewater management in developing countries and the treatment of phenolic wastewater using rotating biological contactors.

Julie Chambers:

As a scholar exactly feel bored to help reading. If their teacher asked them to go to the library or make summary for some guide, they are complained. Just minor students that has reading's heart and soul or real their hobby. They just do what the educator want, like asked to go to the library. They go to there but nothing reading significantly. Any students feel that studying is not important, boring and can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we wish. Likewise word says, many ways to reach Chinese's country.
