## **Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S)** Mathias Lux, Oge Marques

Visual information retrieval (VIR) is an active and vibrant research area, which attempts at providing means for organizing, indexing, annotating, and retrieving visual information (images and videos) from large, unstructured repositories. The goal of VIR is to retrieve matches ranked by their relevance to a given query, which is often expressed as an example image and/or a series of keywords. During its early years (1995-2000), the research efforts were dominated by content-based approaches contributed primarily by the image and video processing community. During the past decade, it was widely recognized that the challenges imposed by the lack of coincidence between an image's visual contents and its semantic interpretation, also known as semantic gap, required a clever use of textual metadata (in addition to information extracted from the image's pixel contents) to make image and video retrieval solutions efficient and effective. The need to bridge (or at least narrow) the semantic gap has been one of the driving forces behind current VIR research. Additionally, other related research problems and market opportunities have started to emerge, offering a broad range of exciting problems for computer scientists and engineers to work on. In this introductory book, we focus on a subset of VIR problems where the media consists of images, and the indexing and retrieval methods are based on the pixel contents of those images -- an approach known as content-based image retrieval (CBIR). We present an implementation-oriented overview of CBIR concepts, techniques, algorithms, and figures of merit. Most chapters are supported by examples written in Java, using Lucene (an open-source Java-based indexing and search implementation) and LIRE (Lucene Image REtrieval), an open-source Java-based library for CBIR. Table of Contents: Introduction / Information Retrieval: Selected Concepts and Techniques / Visual Features / Indexing Visual Features / LIRE: An Extensible Java CBIR Library / Concluding Remarks

### **From reader reviews:**

#### **Lisa Rice:**

Do you have something that you enjoy such as book? The guide lovers usually prefer to select book like comic, short story and the biggest the first is novel. Now, why not attempting Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) that give your enjoyment preference will be satisfied by means of reading this book. Reading behavior all over the world can be said as the opportunity for people to know world better then how they react towards the world. It can't be explained constantly that reading practice only for the geeky man or woman but for all of you who wants to end up being success person. So , for all of you who want to start reading through as your good habit, you may pick Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) become your starter.

#### **Fran Short:**

This Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) is great e-book for you because the content and that is full of information for you who all always deal with world and still have to make decision every minute. This particular book reveal it information accurately using great arrange word or we can state no rambling sentences included. So if you are read that hurriedly you can have whole info in it. Doesn't mean it only provides straight forward sentences but tough core information with attractive delivering sentences. Having Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) in your hand like getting the world in your arm, details in it is not ridiculous 1. We can say that no publication that offer you world inside ten or fifteen minute right but this publication already do that. So , this can be good reading book. Hello Mr. and Mrs. stressful do you still doubt that?

#### **Bryan Perry:**

Beside this specific Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) in your phone, it might give you a way to get closer to the new knowledge or details. The information and the knowledge you will got here is fresh from the oven so don't become worry if you feel like an older people live in narrow community. It is good thing to have Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) because this book offers to your account readable information. Do you often have book but you do not get what it's all about. Oh come on, that will not end up to happen if you have this with your hand. The Enjoyable set up here cannot be questionable, including treasuring beautiful island. So do you still want to miss it? Find this book along with read it from right now!

#### **Alice Edwards:**

Some individuals said that they feel bored stiff when they reading a reserve. They are directly felt that when

they get a half areas of the book. You can choose often the book Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) to make your own reading is interesting. Your personal skill of reading talent is developing when you like reading. Try to choose easy book to make you enjoy to read it and mingle the feeling about book and reading through especially. It is to be initially opinion for you to like to wide open a book and learn it. Beside that the e-book Visual Information Retrieval using Java and LIRE (Synthesis Lectures on Information Concepts, Retrieval, and S) can to be your friend when you're feel alone and confuse with what must you're doing of these time.
