Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap

Teresa K. Attwood, Stephen R. Pettifer, David Thorne

Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap Teresa K. Attwood, Stephen R. Pettifer, David Thorne

This innovative book provides a completely fresh exploration of bioinformatics, investigating its complex interrelationship with biology and computer science. It approaches bioinformatics from a unique perspective, highlighting interdisciplinary gaps that often trap the unwary.

The book considers how the need for biological databases drove the evolution of bioinformatics; it reviews bioinformatics basics (including database formats, data-types and current analysis methods), and examines key topics in computer science (including data-structures, identifiers and algorithms), reflecting on their use and abuse in bioinformatics.

Bringing these disciplines together, this book is an essential read for those who wish to better understand the challenges for bioinformatics at the interface of biology and computer science, and how to bridge the gaps. It will be an invaluable resource for advanced undergraduate and postgraduate students, and for lecturers, researchers and professionals with an interest in this fascinating, fast-moving discipline and the knotty problems that surround it.

From reader reviews:

Tyler Woodley:

Do you among people who can't read enjoyable if the sentence chained within the straightway, hold on guys this aren't like that. This Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap book is readable through you who hate the straight word style. You will find the information here are arrange for enjoyable reading experience without leaving perhaps decrease the knowledge that want to supply to you. The writer of Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap content conveys prospect easily to understand by many individuals. The printed and e-book are not different in the information but it just different in the form of it. So , do you nonetheless thinking Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap is not loveable to be your top record reading book?

Jeffery Chavis:

The guide with title Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap has a lot of information that you can learn it. You can get a lot of help after read this book. That book exist new information the information that exist in this e-book represented the condition of the world right now. That is important to yo7u to find out how the improvement of the world. This specific book will bring you with new era of the glowbal growth. You can read the e-book with your smart phone, so you can read this anywhere you want.

Terry Klatt:

The actual book Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap has a lot of information on it. So when you make sure to read this book you can get a lot of advantage. The book was authored by the very famous author. Mcdougal makes some research ahead of write this book. This book very easy to read you can obtain the point easily after scanning this book.

Nona Smith:

Reading a reserve make you to get more knowledge from this. You can take knowledge and information from the book. Book is prepared or printed or illustrated from each source this filled update of news. In this modern era like right now, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you ready to spend your spare time to spread out your book? Or just trying to find the Bioinformatics Challenges at the Interface of Biology and Computer Science: Mind the Gap when you necessary it?
