Eucalypts of the Sydney Region: A Bushwalker's Guide Gary Leonard

Designed to fit into the backpack of bushwalkers, students, botanists, field ecologists and foresters, *Eucalypts of the Sydney Region* describes the most common eucalypt species found in the Sydney region (from Newcastle and Nowra and west beyond Katoomba). Each species description comes with a distribution map, line drawings of buds and fruit, a colored photograph of the bark and a diagram indicating growth habit. Species are grouped to assist with easy identification and comparison with similar species. The book avoids the use of specialist botanical terms, is designed for non-technical enthusiasts, and contains a wealth of detail for those wishing to become familiar with individual eucalypt species.
