Topics in Quantum Field Theory: Modern Methods in Fundamental Physics : Maynooth, Ireland 24-26 May 1995

This text constitutes the proceedings of a meeting which brought together contributors from the four European networks in the area of the theory of fundamental interactions. The wide range of topics in quantum field theory covered includes Hamiltonian and semiclassical methods, as well as statistical-mechanical approaches to critical phenomena and low-dimensional field theories. This, together with the leading item on the recent history of the subject, gives an overall perspective of the many new research directions in this area.
