Meta-analysis in Medical Research: The handbook for the understanding and practice of meta-analysis Gioacchino Leandro

This book is a joint package of a **practical manual** on how to undertake meta-analysis in medicine together with an accompanying **CD-ROM**. This provides individuals with access to meta-analysis software and the instructions and guidance on how to undertake them.

The software package contains a computer program 'Metanalysis' which performs statistical analyses for the meta-analysis. It has some unique features currently not available in other meta-analysis software packages:

- ability to import graphics into Word, PowerPoint etc
- Galbraith's plots
- cumulative meta-analysis
- number needed to treat
- publication bias assessment

The graphics generated by the software are in a format compatible with Microsoft PowerPoint.
