Neoliberalism: Beyond the Free Market Damien Cahill, Lindy Edwards, Frank Stilwell

In this timely book, leading scholars of neoliberalism, together with emerging researchers from a range of intellectual traditions, reflect upon the nature of neoliberalism in light of the recent and ongoing global financial crisis. What emerges is an enlightening picture of the diversity of neoliberalism. The complex relationships between theory and practice are highlighted as the contributors recognize the need to move beyond the commonplace notion that neoliberalism is simply a system of free markets. Topical chapters examine the implications of the current crisis for neoliberalism, the likelihood of alternatives and how these might arise.

Presenting a range of different theoretical approaches to understanding neoliberalism, this book will appeal to academics in the fields of political economy, political science, public policy, human geography, international studies, sociology and regulation studies. Graduate and senior undergraduate students in these fields will also find much to interest them.
