Every patient is unique, and the evolving field of precision medicine aims to ensure the delivery of the right treatment to the right patient at the right time. In an era of rapid advances in biomedicine and enhanced understanding of the genetic basis of disease, health care providers increasingly have access to advanced technologies that may identify molecular variations specific to an individual patient, which subsequently can be targeted for treatment. Known as biomarker tests for molecularly targeted therapies, these complex tests have the potential to enable the selection of the most beneficial treatment (and also to identify treatments that may be harmful or ineffective) for the molecular underpinnings of an individual patient's disease. Such tests are key to unlocking the promise of precision medicine.

Biomarker tests for molecularly targeted therapies represent a crucial area of focus for developing methods that could later be applicable to other areas of precision medicine. The appropriate regulatory oversight of these tests is required to ensure that they are accurate, reliable, properly validated, and appropriately implemented in clinical practice. Moreover, common evidentiary standards for assessing the beneficial impact of biomarker-guided therapy selection on patient outcomes, as well as the effective collection and sharing of information related to those outcomes, are urgently needed to better inform clinical decision making.

Biomarker Tests of Molecularly Targeted Therapies examines opportunities for and challenges to the use of biomarker tests to select optimal therapy and offers recommendations to accelerate progress in this field. This report explores regulatory issues, reimbursement issues, and clinical practice issues related to the clinical development and use of biomarker tests for targeting therapies to patients. Properly validated, appropriately implemented biomarker tests hold the potential to enhance patient care and improve outcomes, and therefore addressing the challenges facing such tests is critical.

From reader reviews:

Kenneth Wallace:

Information is provisions for folks to get better life, information today can get by anyone at everywhere. The information can be a know-how or any news even a problem. What people must be consider when those information which is from the former life are hard to be find than now is taking seriously which one is suitable to believe or which one often the resource are convinced. If you obtain the unstable resource then you have it as your main information you will see huge disadvantage for you. All those possibilities will not happen inside you if you take Biomarker Tests for Molecularly Targeted Therapies: Key to Unlocking Precision Medicine as your daily resource information.

Lynn Hardie:

Do you one of the book lovers? If so, do you ever feeling doubt while you are in the book store? Try and pick one book that you just dont know the inside because don't ascertain book by its cover may doesn't work here is difficult job because you are afraid that the inside maybe not because fantastic as in the outside search likes. Maybe you answer can be Biomarker Tests for Molecularly Targeted Therapies: Key to Unlocking Precision Medicine why because the amazing cover that make you consider in regards to the content will not disappoint you actually. The inside or content is actually fantastic as the outside or maybe cover. Your reading sixth sense will directly show you to pick up this book.

Toby Lowry:

As we know that book is important thing to add our knowledge for everything. By a book we can know everything you want. A book is a set of written, printed, illustrated or even blank sheet. Every year seemed to be exactly added. This reserve Biomarker Tests for Molecularly Targeted Therapies: Key to Unlocking Precision Medicine was filled about science. Spend your extra time to add your knowledge about your technology competence. Some people has various feel when they reading the book. If you know how big good thing about a book, you can really feel enjoy to read a publication. In the modern era like now, many ways to get book that you simply wanted.

Irene Gamino:

That reserve can make you to feel relax. This particular book Biomarker Tests for Molecularly Targeted Therapies: Key to Unlocking Precision Medicine was colourful and of course has pictures on there. As we know that book Biomarker Tests for Molecularly Targeted Therapies: Key to Unlocking Precision Medicine has many kinds or genre. Start from kids until teenagers. For example Naruto or Private eye Conan you can read and think that you are the character on there. Therefore , not at all of book are generally make you bored, any it offers you feel happy, fun and chill out. Try to choose the best book for you personally and try

to like reading this.
