Excerpt from Logic

IT is not augmenting the sciences, but disfiguring them, when their boundaries are allowed to encroach, on one another. -for which reason; and as logic is a science, wherein nothing is fully shewn and strictly proved but the formal rules of all thinking, and as we by consequence abstract in it from all objects of knowledge, as well as from their difference, our author has left us his logic free from every extraneous admixture of either ontological, or anthropological, 'or psychological, or metaphysical matter.
